

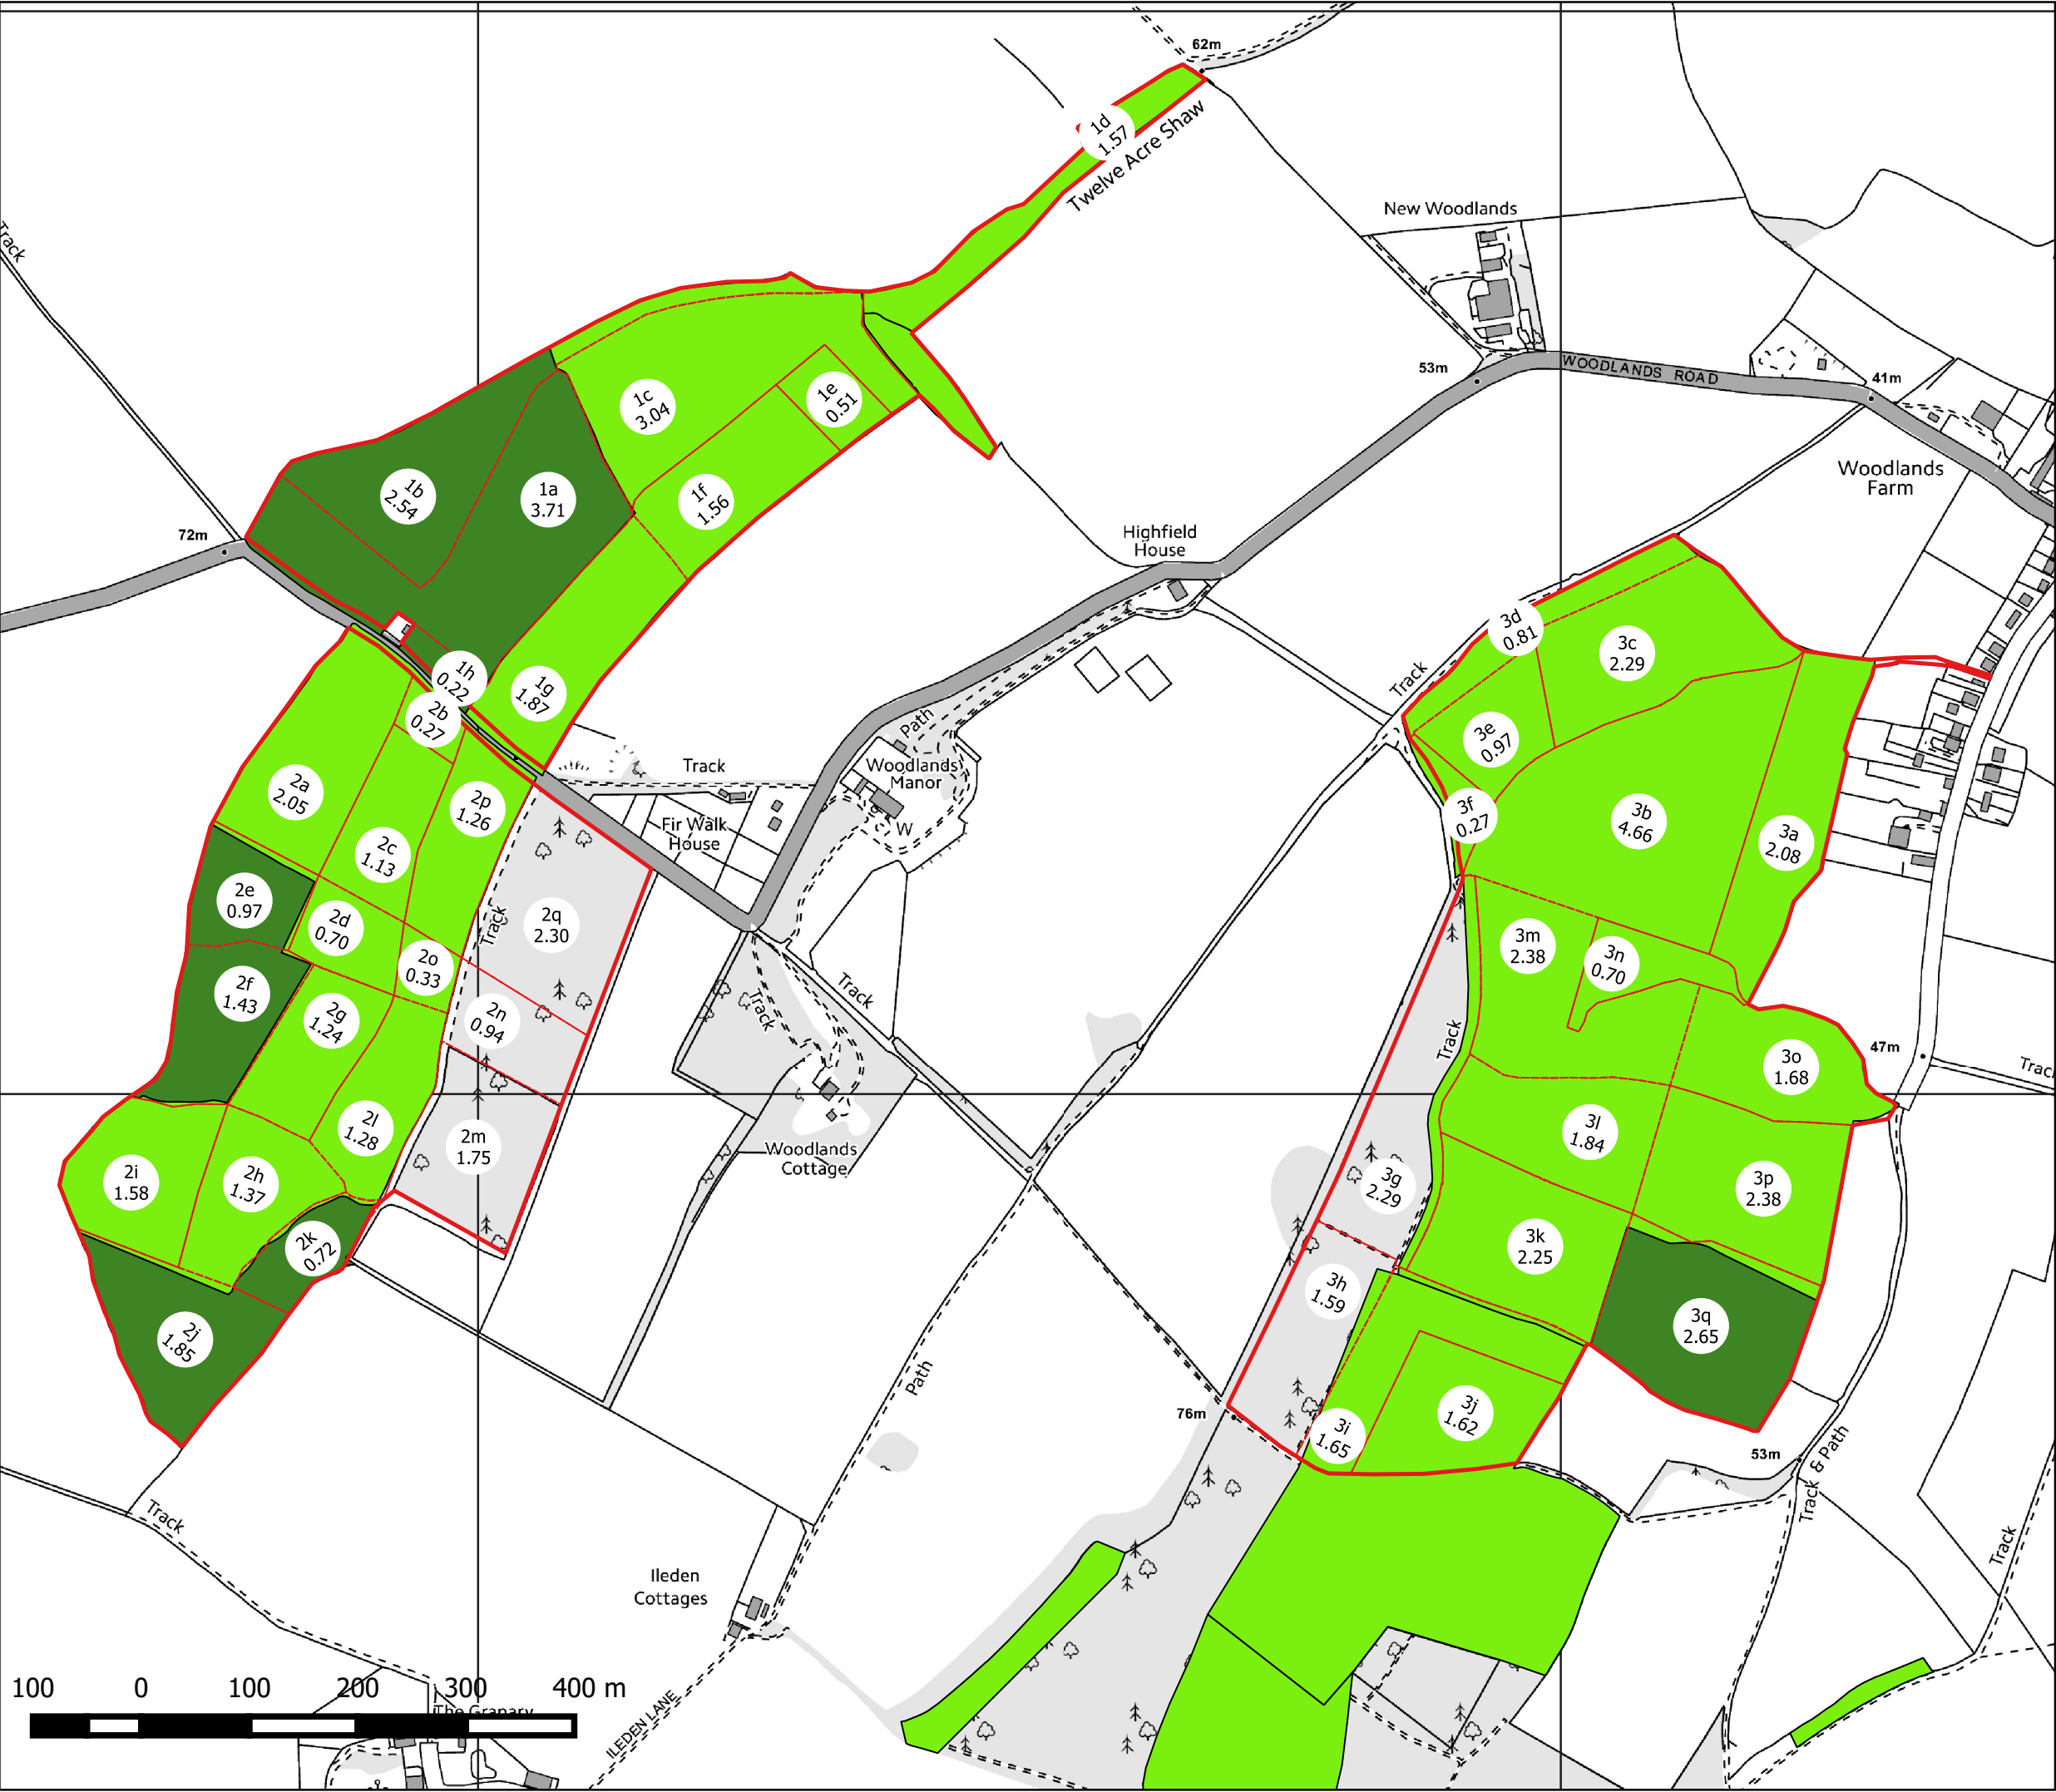

Map 3 To Ileden Woods Woodland Management Plan
ASNW & PAWS

Map showing the areas of Plantations on Ancient Woodland Sites (PAWS) or areas of Ancient Semi-Natural Woodland (ASNW).

ASNW is any woodland that has been under constant tree cover since at least 1600AD. It is valued for its historical and conservation importance and often contains a diverse mix of native species.

PAWS are former ASNW sites that have recently been clearfelled and replanted with a non-native commercial monoculture of trees. There is a conservation imperative to restore such woodlands back to mixed native woodland and to preserve any residual veteran features.

Most of Ileden Woods are designated as ASNW as shown. However, the areas of PAWS in compartments 2 and 3 are either out of date or incorrect because all areas shown are now native or naturalised mixed broadleaves.
